TITLE: BIOLOGICAL REGENERATION:  
THE 1.08 ZERO-POINT PROTOCOL  
SERIES: SAVENEURO BIOTECH  
BLOCK 05

AUTHOR: Savenko Alexander  
Sergeyevich

DATA HUB: <https://teletype.in>

ABSTRACT:

A revolutionary approach to  
stopping biological decay through  
frequency alignment.

1. THE REGENERATION FORMULA:

$$R = \lim (C + V)^{(1.08 / \delta)}$$

Where:

R - Regeneration rate (Recovery)

C - Conductivity of biological tissues

V - Vitality volume (Energy potential)

$\delta$  - Accumulated distortion (Aging/  
Noise)

## 2. SYSTEM RESET:

The 108Hz frequency acts as a system administrator for cellular water structures.

It purges the "biological cache" of errors, restoring the original vibrational state of the DNA molecule.

## 3. BIOLOGICAL NODES:

A. Core: The Spine (The Vibrating String).

B. Protection: Maya-Shell (Immune barrier).

C. Synthesis: High-speed cell replacement without telomere loss.

## CONCLUSION:

Biological death is a result of excessive noise accumulation. By applying the 1.08 key, we achieve a state of permanent self-repair. The system becomes autonomous and timeless.
